Education

BTech in Information Technology   Expected July 2028
Vellore Institute of Technology   *Vellore, India*

Experience

Software Developer Intern   May 2025 – July 2025
Numagix Entertainment LLP   *Bangalore, India*

- Built an internal admin dashboard for real-time insights into usage, transactions, and system performance.
- Designed a summary page to visualize activity across different time scales (daily, weekly, monthly, yearly).
- Implemented an analytics page tracking metrics such as engagement, session volume, and peak times.
- Integrated Azure PostgreSQL as the primary database and configured Azure Blob Storage for storing and managing event logs.
- Used Next.js for frontend and deployed the platform on Microsoft Azure infrastructure.
- Retrieved logs dynamically using secure Azure Blob APIs for debugging and audits.

Skills

Languages: JavaScript, TypeScript, Python, C++

Frontend: React.js, Next.js, Firebase

Backend & DevOps: Node.js, REST APIs, GraphQL, PostgreSQL, Docker, Microsoft Azure

Projects

FFCS-inator   GitHub — Website

- Worked as part of the CodeChef VIT team to build a web app helping students plan their Fully Flexible Credit System (FFCS) schedules.
- Developed core frontend using React.js and Next.js for searching, filtering, and viewing courses and timetables.
- Built UI components with Tailwind CSS for responsiveness and usability.
- Contributed logic to generate conflict-free timetables and customize combinations.
- Tested and refined the tool based on club and student feedback.

Typing Test Website   GitHub — Website

- Built a full-featured typing test site with user progress tracking, minimalist UI, and pagination.
- Frontend: TypeScript, Next.js, React.js, Firebase; Redux for state management.
- Backend: Node.js, Express.js, GraphQL, PostgreSQL.
